

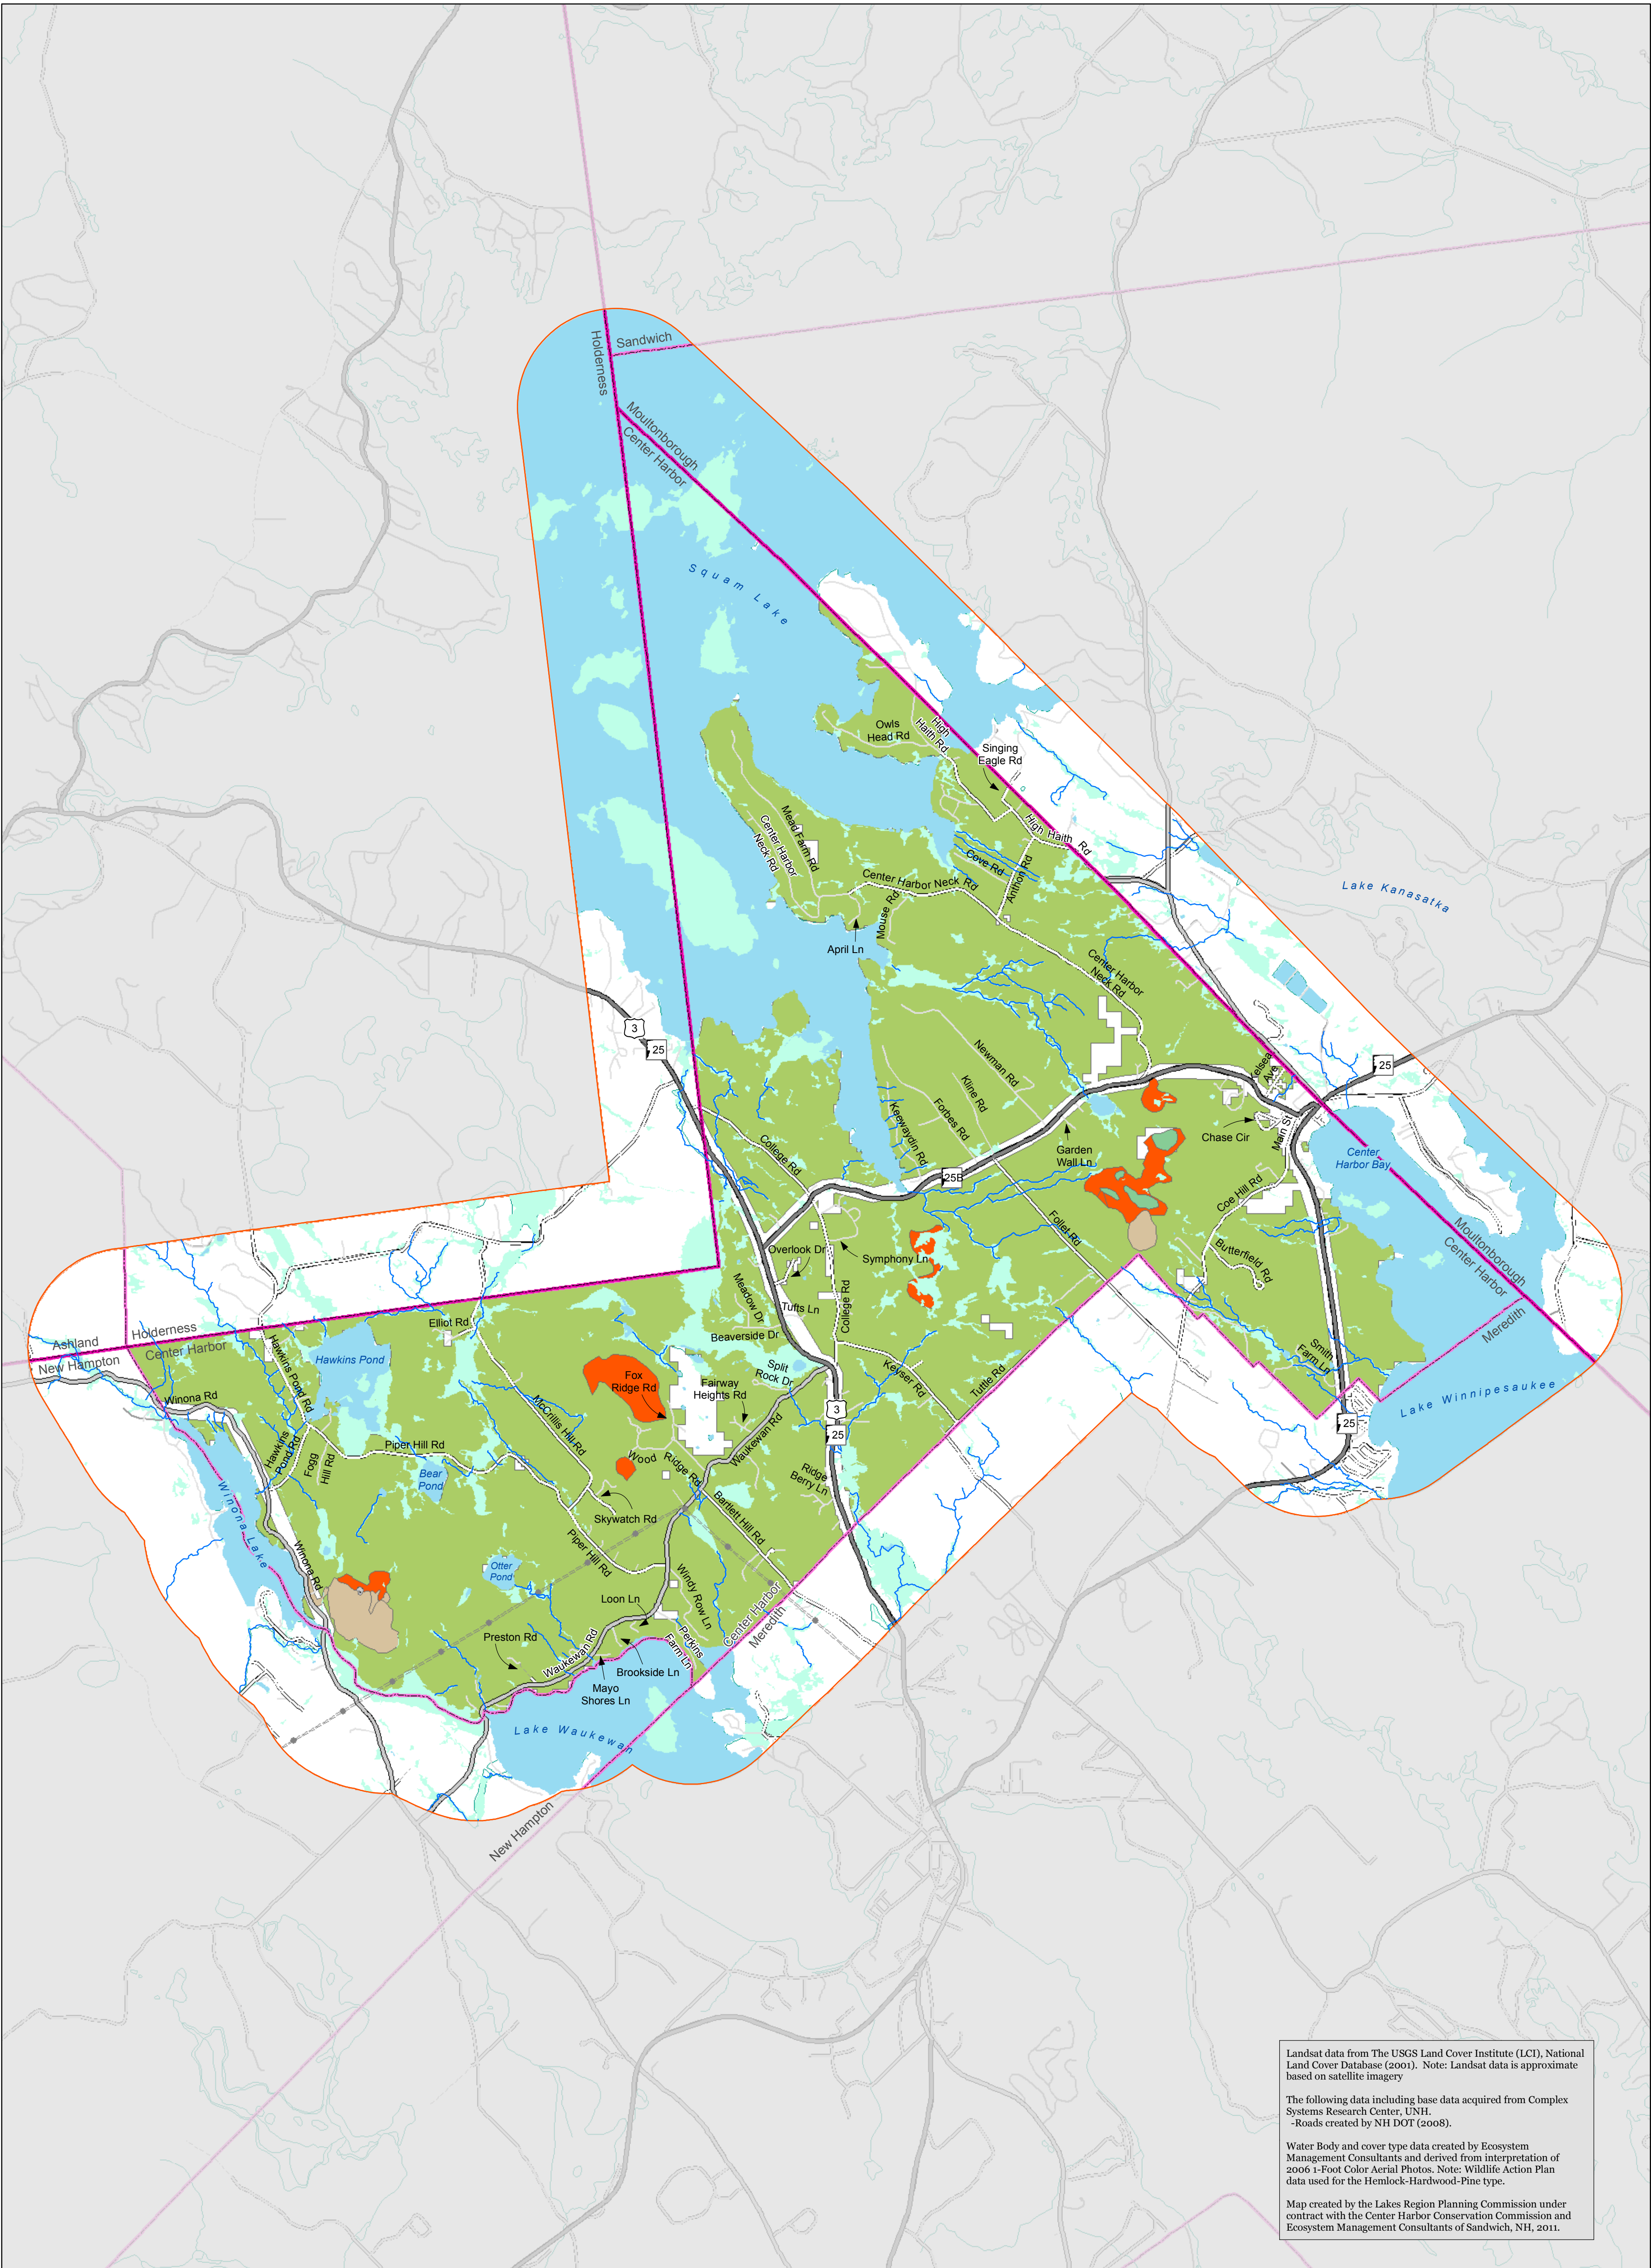

Map 6-3: Forest Cover

Landsat data from The USGS Land Cover Institute (LCI), National Land Cover Database (2001). Note: Landsat data is approximate based on satellite imagery

The following data including base data acquired from Complex Systems Research Center, UNH.

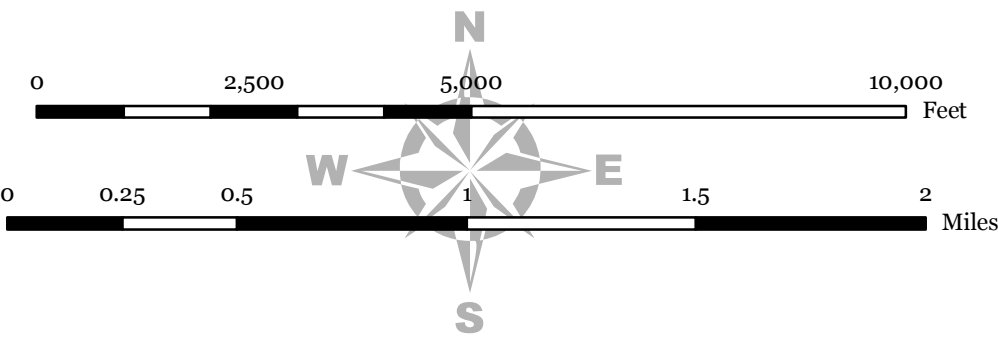

-Roads created by NH DOT (2008).

Water Body and cover type data created by Ecosystem Management Consultants and derived from interpretation of 2006 1-Foot Color Aerial Photos. Note: Wildlife Action Plan data used for the Hemlock-Hardwood-Pine type.

Map created by the Lakes Region Planning Commission under contract with the Center Harbor Conservation Commission and Ecosystem Management Consultants of Sandwich, NH, 2011.

Forest Cover Map

- |                             |                       |                              |
|-----------------------------|-----------------------|------------------------------|
| Appalachian Oak-Pine        | Half Mile Buffer      | Local Road                   |
| Lowland Spruce-Fir          | County Boundary       | Non-Maintained Road          |
| Northern Hardwood-Conifer   | Town Boundary         | Private Road                 |
| Ridge-Talus Woodlands       | Utility ROW           | Wetlands (including Islands) |
| Hemlock-Hardwood-Pine       | State Maintained Road | Hydrography (USGS)           |
| Rivers & Streams (adjusted) |                       |                              |
