

BROADBAND FOR RURAL NEW HAMPSHIRE!

WE'RE COMING TO YOUR TOWN...LET'S CONNECT!

More than 80 years after bringing light and power to small towns around the state, New Hampshire Electric Cooperative (NHEC) is providing the next essential service to those same towns: a fast, reliable internet connection.

Through our subsidiary, **NH Broadband**, NHEC is building fiber-optic networks that will deliver high-speed internet service (up to 2 Gig per second) in more than 70 towns, including yours!

We want to introduce you to **NH Broadband** and let you know what to expect as we work in your communities in the coming months and years.

PHASE 1: NETWORK CONSTRUCTION

Discover the 7 Stages of Building a FTTH Network

1 Make Ready Engineering

2 Make Ready Construction

3 Fiber Construction

4 Splicing

5 Service Drop Construction

6 Drop Splicing

7 Home or Business Installation

PHASE 2: SERVICE AVAILABILITY

When the fiber-optic network has been built and tested, your town's residents can connect! Residents can order a speed package and schedule installation of their service by calling **(866) 431-1928**, or by ordering online at www.nhbroadband.com.
